Recent Experience

Yellow Pencil | Backend Developer / Cloud Infrastructure Lead

Nov 2020 - Present | Edmonton AB

- Managing Kubernetes infrastructure that serves 50+ high-traffic public sector websites across North America
- Configured several CI / CD pipelines and made scripts that provision cloud environments for Drupal websites
- Developed internal tools that allow developers to self-serve their day-to-day needs (e.g. viewing site info / deployment statuses / server logs / SLA reports, as well as downloading site assets / database back-ups)
- Ported the aforementioned features served the tools to the company enterprise development platform product
- Inherited and led development efforts for a large-scale search engine integrated on 50+ government websites

Codepxl | Full Stack Developer

Nov 2019 - Nov 2020 | Toronto ON

- Collaborated with an agile team to develop and serve 20+ web applications for Greater Toronto Area clients
- Developed a content management system that allow real estate agents to generate websites and virtual tours
- Co-piloted the back end development and production launch of a custom social network application
- Created continuous integration and deployment pipelines for a number of existing codebases

Red Piston | Full Stack Developer

Apr 2018 - Nov 2019 | Windsor ON

- Contributed to the development of 10+ websites across local businesses and Fortune 500 companies
- Developed a full stack web application that allow authenticated users to create customized audio tracks
- Created internal web tools that automate the creation of daily emails and weekly landing pages

CIBC Private Wealth | Software Developer

Sep 2015 - Apr 2018 | Windsor ON

- Led the development of a desktop application that generates investment performance reports for 100+ clients
 - Developed internal tools to track client servicing and build ranking reports based on financial metrics
 - Promoted client education by building a web application that simulates various investment scenarios
-
